Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicant has certain areas within the claims (claim 1, lines 5-8 for example) wherein there are parenthesis with bracketed characters within these parentheses. Therefore, it is not clear what applicant intends to strike from the claims and what applicant intends to include in the claims.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 2 and 6-10 are rejected under 35 U.S.C. 102 (a or e) as being clearly anticipated by Komori et al, US Patent No. 6,403,690.
5. Komori et al discloses flame retardant thermoset resin compositions including phosphaphenanthrene-10-oxide compounds that directly correspond to those of

Art Unit: 1796

applicant's claims. The polyester, vinyl ester and urethane acrylate resins are used as varnishes and are typically thermoset resins. See col 1, line 56 through col. 2, line 48.

6. No patentable difference is readily ascertained.

7. Claims 1, 2, 4, 5 and 8-10 are rejected under 35 U.S.C. 102 (e) as being clearly anticipated by Macdonald et al US PG Pub 2004/0097621.

8. Macdonald et al discloses flame retardant thermoplastic resin compositions including phosphaphenanthrene-10-oxide compounds that directly correspond to those of applicant's claims. The polyester, resins are used as films and are thermoplastic resins. See the abstract and paragraphs [0018] through [0038].

9. No patentable difference is readily ascertained.

10. Claims 1, 2, 4, 5 and 8-10 are rejected under 35 U.S.C. 102 (b) as being clearly anticipated by each of Japanese references 2001-122977, 2001-294759, 2001-316543 all cited by Applicant in the International Search report.

11. Each reference discloses flame retardant thermoplastic resin compositions including phosphaphenanthrene-10-oxide compounds that directly correspond to those of applicant's claims. The polyacrylonitrile, and styrene resins are thermoplastic resins. See the English abstract of each reference.

12. No patentable difference is readily ascertained.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kriellion A. Sanders whose telephone number is 571-272-1122. The examiner can normally be reached on Monday through Thursday 8:30am-7:00pm.
